

Greetings from the Northern Link project team! I am Dominic Law, Project Manager – Northern Link of the MTR Corporation.

Thanks to the support of the community, the planning and design of Kwu Tung Station on the East Rail Line are progressing smoothly. We will continue to make our best endeavours to realise our target of Kwu Tung Station commencing service as early as possible, serving as a new public transport hub in the area and providing residents with efficient and convenient railway services.

In the meantime, we are moving full steam ahead on the planning and design of the 10.7km Northern Link. The Northern Link will connect the Tuen Ma Line (running through the east and west of the New Territories and east Kowloon) and the East Rail Line (with service soon to be extended to Hong Kong Island). The Northern Link will form a railway loop in the northern New Territories to make travelling between Hong Kong Island, Kowloon and New Territories easier for residents and promote the sustainable development of communities along the alignment. It will also provide new impetus for growth and advance our concerted efforts in building a sustainable future for all.

To facilitate your understanding of the Northern Link project, we have prepared the enclosed project leaflet for your reference. We will maintain close communication with the community, provide the latest updates and listen to your opinions.

Last but not least, I wish you and your family good health during the pandemic.

Dominic Law
